

## Assessment: Advances in Empirical Economics and Econometrics

12 November 2021

The assessment consists in an oral presentation and an empirical exercise using R.

1. It can be done either by groups of at most 2 (the preferable option) or alone.
2. The group should focus on a single paper of interest either taken from the list of papers given in Syllabus TM 2021.pdf on Moodle, or an empirical paper of interest to which methods seen during the lecture could be applied.
3. The deadline for constituting groups and choosing preferences about the paper of interest is November 30th. Please send your names, the topic of interest as well as the paper to [thierry.magnac@tse-fr.eu](mailto:thierry.magnac@tse-fr.eu).
4. An oral presentation lasts 15 minutes during which is discussed:
  - Context -- the relationship with the course -- methods, and results are briefly presented (10 minutes, 5 slides max).
  - The principle of the empirical exercise to be performed, and motivated by the paper, using either simulations or the original data, is presented (5 minutes, 2 slides max)
  - Questions and discussion about the empirical project last 10 minutes.
  - Please send slides in pdf format 2 days before the presentation to [thierry.magnac@tse-fr.eu](mailto:thierry.magnac@tse-fr.eu)
5. Questions and discussion about the empirical project takes place during 15 minutes.
6. The date for these presentations is to be decided (December 17<sup>th</sup>?)
7. The date at which the empirical exercise report is sent is to be decided (mid-January?)
